Front End

Feature	Type	Description	Instructions	Expected Result	Correct Result?
Form Reset	UX	Form clears after submission	Inventory → +Add Product → (Add text) → Add Product → + Add Product	New product form is empty after previous submission	☑
Layout	UI	User can access site tabs	Dashboard → Inventory → Sales → Reports	Page redirects to corresponding tabs	☑
Add Product	Functional	User can add a new inventory item	Inventory → +Add Product → Enter Product Details → Add Product	Appends product with information to Inventory	☐
State Persistence	Functional	Information will persist upon reload	Reload pages with database data	Database data will not be erased	☑

Feature	Type	Description	Instructions	Expected Result	Correct Result?
Search/Filtering	Functional	User can filter inventory items by name, category, or SKU	Inventory → Search products → (Add text)	System displays sorted inventory with key words	☑
Edit Item	Functional	User can update an existing item	Inventory → Edit Icon → (Edit Text)	Item data is updated and stored	☑
Delete Item	Functional	User can delete an existing item	Inventory → Delete Icon	Item data is deleted	☑
Add Product	Error Handling	System will deny a new product without details	Inventory → +Add Product → Add Product (No text)	System prompts fields to fill out	☑
No Search Results	Edge Case	User is notified when no items match search criteria	Inventory → Search products → (Add text)	System displays no items found message when nothing is returned in search	☑

Back-end testing idea: in each product category, test the following:

1. Dynamic expansion of table
2. Create new item
3. Change/update item
4. Delete item (from front page, although it should persist for record's sake; maybe "archive" table for this?)
5. Manual and Auto updates
6. Manual and Auto discounts
7. Refunds (always manual)
8. Low stock alerts (Manual and default setting, auto send)
9. Cash transaction records
10. Debit transaction records
11. Credit transaction records
12. Daily report
13. Weekly report

Back End

Feature	**Type**	**Description**	**Instructions**	**Expected Result**	**Correct Result?**
Dynamic Table Expansion	Structural				☐
Create New Item	Functional				☐

Feature	Type	Description	Instructions	Expected Result	Correct Result?
Change/Update Item	Functional				☐
Delete Item	Functional	Delete item from front page, although it should persist for record's sake; maybe "archive" table for this?			☐
Manual and Auto updates	Functional				☐
Refunds	Functional	Always manual			☐
Low Stock Alerts	Functional	Manual and default setting, auto send			☐

Feature	Type	Description	Instructions	Expected Result	Correct Result?
Cash transaction records	Functional				☐
Debit transaction records	Functional				☐
Credit transaction records	Functional				☐
Daily report	Functional				☐
Weekly report	Functional				☐
