1. INTRODUCTION

The Inventory and Sales Management System is a lightweight desktop application designed to assist a small retail bike shop in managing inventory, processing sales transactions, and generating sales reports. The system provides an intuitive graphical user interface (GUI) that allows the user to efficiently navigate between core functions such as inventory management, sales, reporting, and low-stock alerts.

2. GETTING STARTED

2.1 System Requirements

- Windows desktop computer
- Application installed locally
- No internet connection required

2.2 Launching the Application

- Open the application from the desktop
- The system will load the **Dashboard**, which serves as the main interface

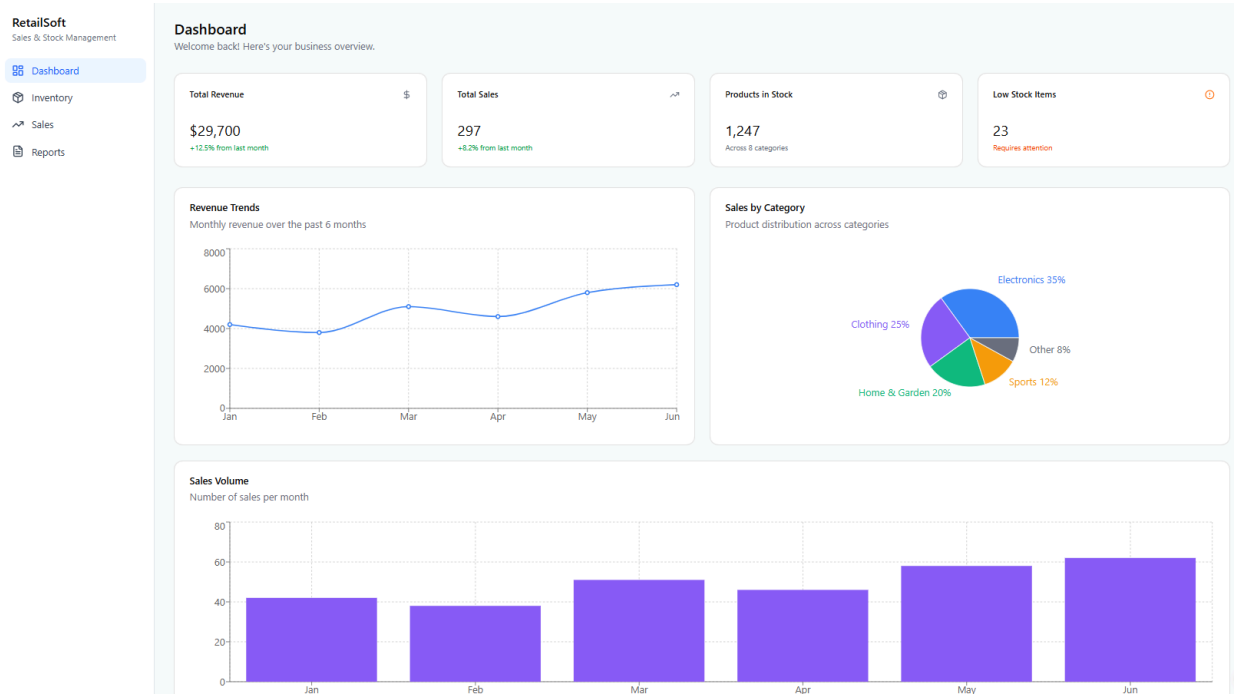

Figure 1: Dashboard (Initial Screen)

3. DASHBOARD (Detailed View)

The Dashboard provides an overview of system activity and serves as the central navigation point.

Features:

- Overview of inventory and sales
- Sales totals and monthly totals
- Low Stock alerts
- Navigation to Inventory, Sales, and Report

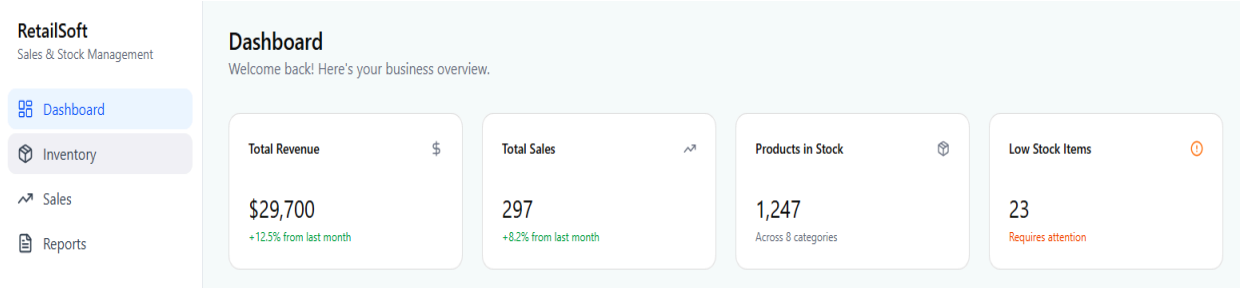

Figure 2: Dashboard Overview

4. INVENTORY MANAGEMENT

The Inventory section allows the user to manage all product-related data.

Features:

- View all products
- Add new products
- Edit product details
- Stock Adjustments

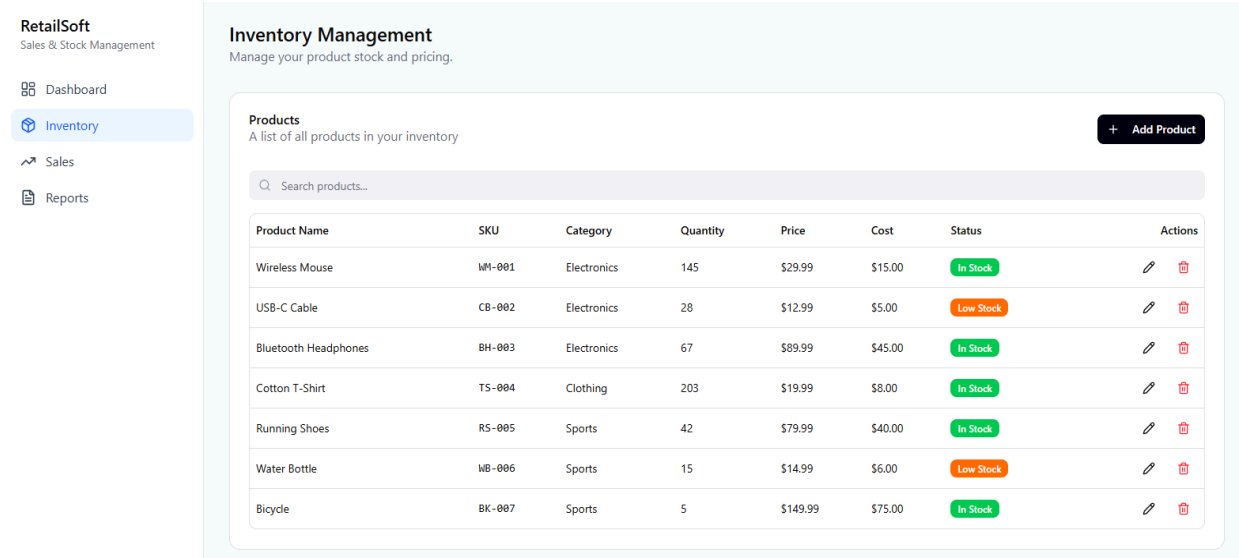

Figure 3: Inventory Management Screen

4.1 Adding a Product

1. Navigate to **Inventory Management**
2. Select **Add Product**
3. The system will open the **New Product Details** screen
4. Enter product details
5. Save the product

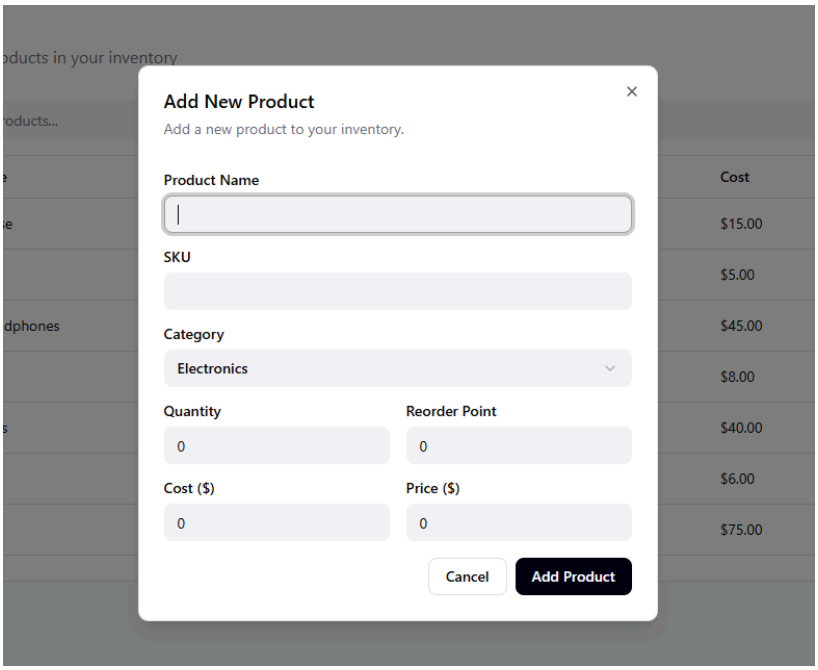

Figure 4: New Product Details Screen

4.2 Editing or Adjusting Stock

1. Select a product from the list (click the pencil icon)
2. Modify product details or stock level
3. Update product

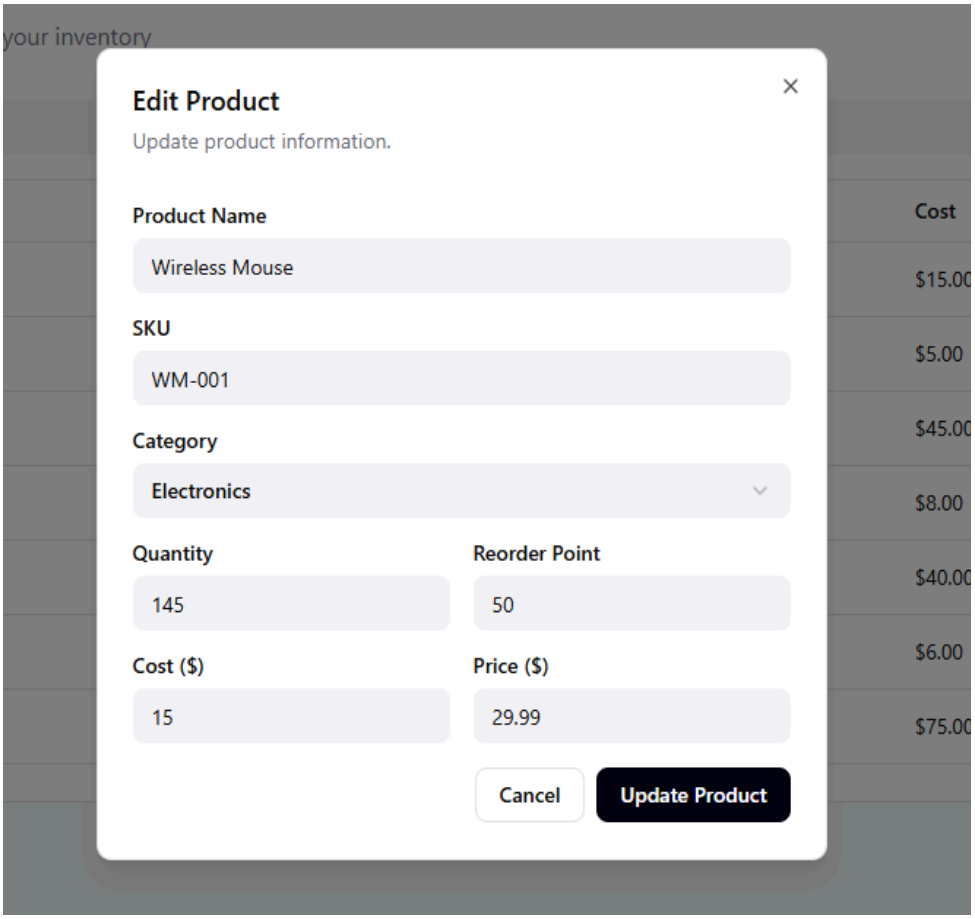

Figure 5: Product Details and Stock Adjustments

5. SALES TRACKING

The Sales section allows the user to record and review transactions.

Features:

- Add new sales
- Sales Orders (view recorded transactions)
- Sales History

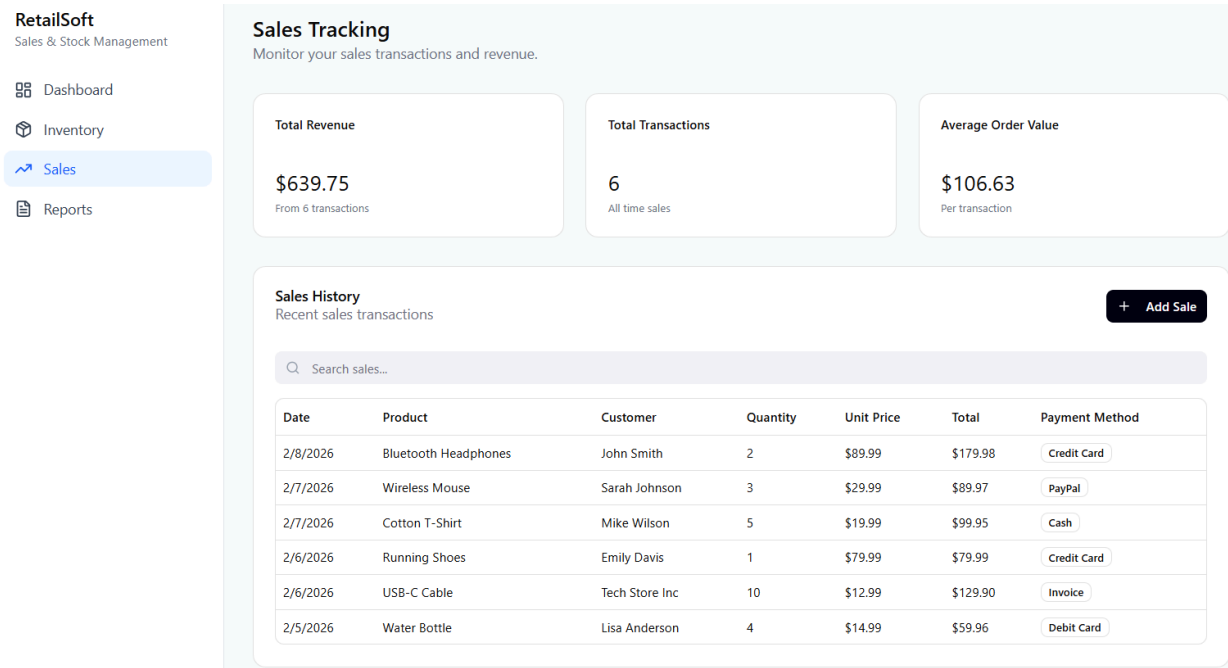

Figure 6: Sales Tracking Page

5.1 Recording a Sale

1. Navigate to **Sales**
2. Select **Add Sale**
3. Enter product and payment details
4. Confirm transaction

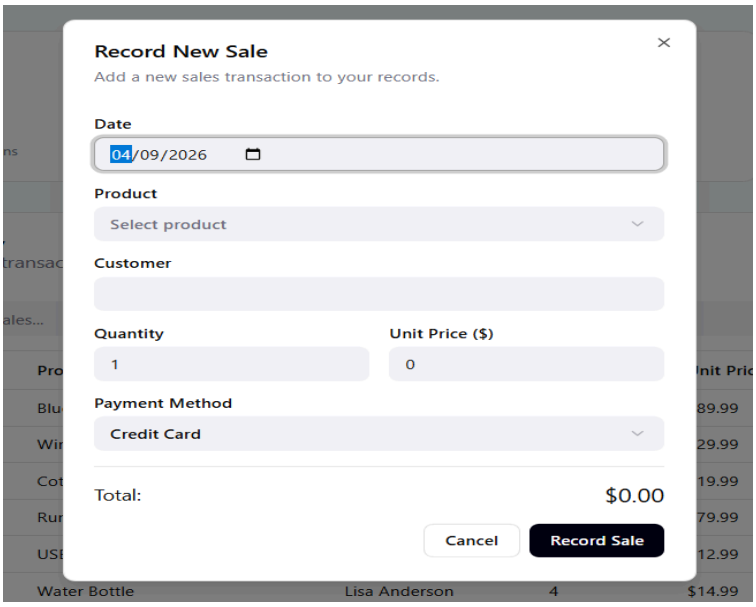

Figure 7: Add Sale Screen

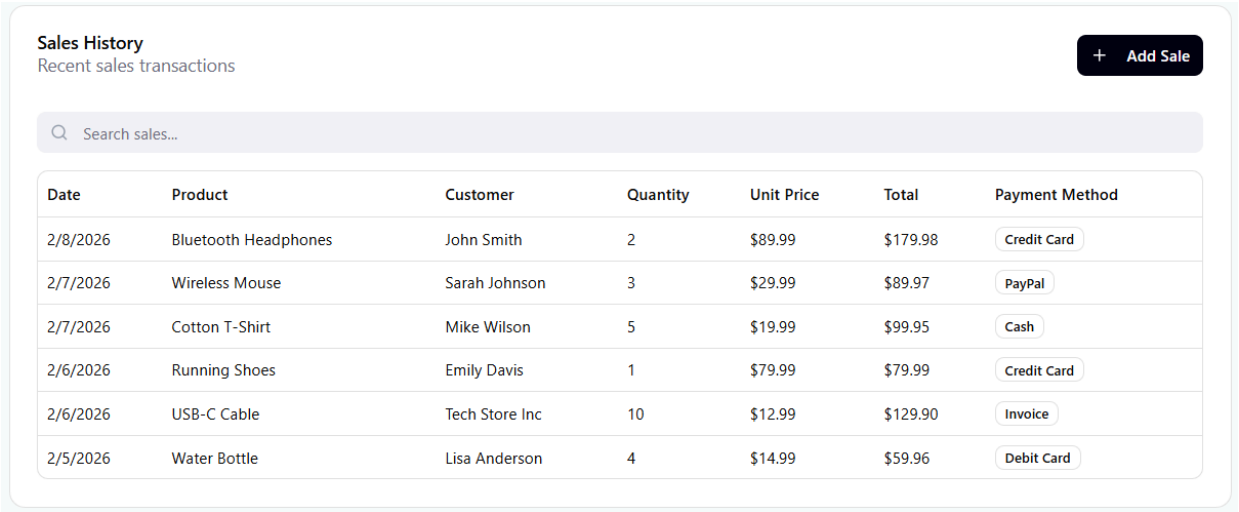
5.2 Viewing Sales History

1. Navigate to **Sales History**
2. Review previous transactions



Date	Product	Customer	Quantity	Unit Price	Total	Payment Method
2/8/2026	Bluetooth Headphones	John Smith	2	$89.99	$179.98	Credit Card
2/7/2026	Wireless Mouse	Sarah Johnson	3	$29.99	$89.97	PayPal
2/7/2026	Cotton T-Shirt	Mike Wilson	5	$19.99	$99.95	Cash
2/6/2026	Running Shoes	Emily Davis	1	$79.99	$79.99	Credit Card
2/6/2026	USB-C Cable	Tech Store Inc	10	$12.99	$129.90	Invoice
2/5/2026	Water Bottle	Lisa Anderson	4	$14.99	$59.96	Debit Card

6. REPORTS

The Reports section provides visual summaries of sales data.

Features:

- Daily and weekly reports
- Sales by category
- Sorted Sales Charts
- Report History
- Export/Download
- Generate CSV

6.1 Viewing Reports

1. Navigate to **Reports**
2. Select the desired report type
3. View the generated chart or summary

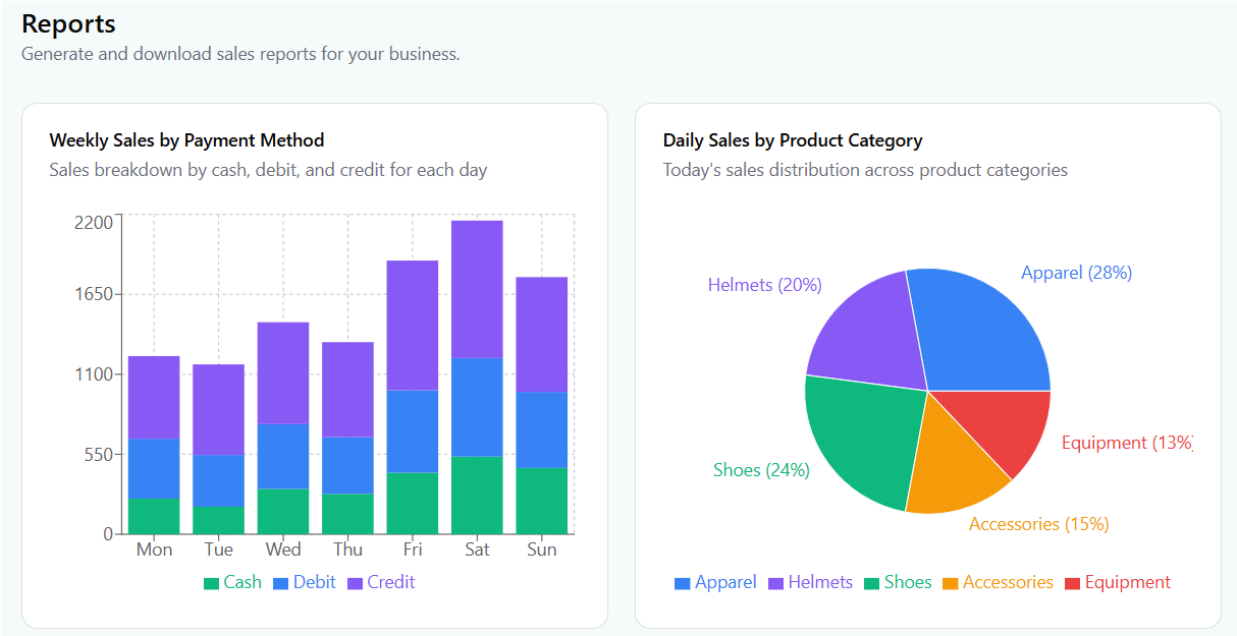

Figure 9: Daily/Weekly Sales Report

6.2 Exporting Reports

1. Navigate to **Reports**
2. Select **Export/Download** or **generate CSV**
3. Save file locally

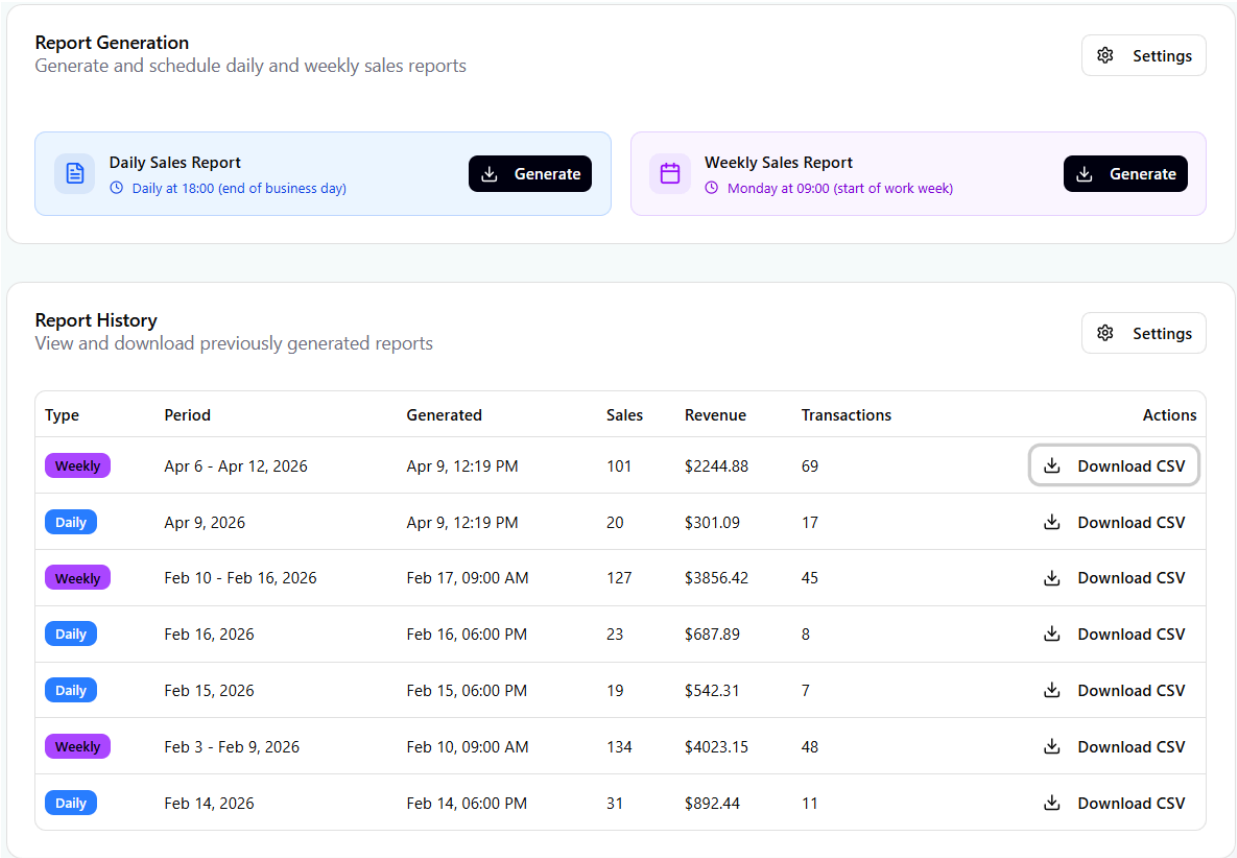

Figure 10: Export and Generate CSV Options

7. LOW STOCK ALERTS

The system notifies the user when inventory levels fall below defined thresholds.

Features:

- View low stock items
- Monitor stock levels

7.1 Viewing Alerts

1. Access alerts from the **Dashboard**
2. Review items that require restocking

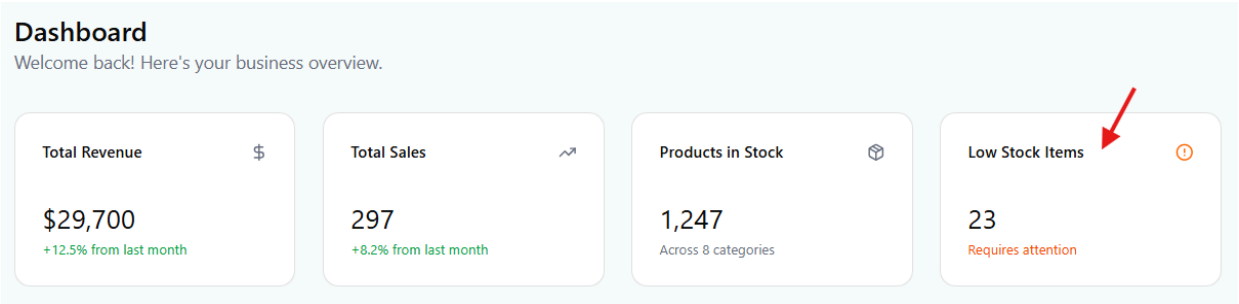

Figure 11: Low stock Alerts Screen

8. EXITING THE SYSTEM

The navigation diagram includes exit paths from multiple sections of the system, indicating that the user can terminate the application from various points. In the current prototype, navigation between screens is simulated using interactive elements in the interface. A dedicated exit control will be implemented in the final system to allow the user to close the application.
